

Skill Link

A Platform to Bridge the Gap Between Skilled Workers and Job Providers

Presented By: Mahesh Yemmewar, Omkar Shakkarwar, Rohit Shejul
Guided By: Prof. Girish Patil
Department of AI & AIML, G.H. Rasoni College of Engineering and Management, Wagholi, Pune

Introduction

India has millions of skilled and semi-skilled workers in fields like construction, carpentry, plumbing, and agriculture. However, many struggle to find consistent work due to poor digital access, lack of visibility, and reliance on middlemen. Skill Link is a digital platform designed to directly connect skilled workers with job providers using AI-powered tools, ensuring transparency, trust, and accessibility for all, including rural and semi-urban communities.

Objectives

- Build a digital platform connecting skilled workers with local job providers.
- Use AI/ML for personalized job recommendations and trust scoring.
- Provide multilingual and voice-assisted support for low digital literacy users.
- Establish credibility with verification, ratings, and reviews.
- Enable scalable, mobile-friendly infrastructure for expansion.

System Workflow

1. Workers register and create verified profiles.
2. Employers post jobs with specific requirements.
3. AI/ML engine matches workers to jobs using skills, location, and ratings.
4. Notifications sent in real-time through app/voice alerts.
5. Chatbot assists with queries and navigation.
6. Ratings and feedback close the loop for continuous improvement.

Expected Outcomes & Impact

- ✔ Increased employment opportunities for skilled laborers.
- ✔ AI-driven smart job matching improves efficiency.
- ✔ Verified profiles and ratings build trust.
- ✔ Accessibility through multilingual & voice features.
- ✔ Reduces dependency on middlemen and unfair practices.
- ✔ Contributes to social empowerment and digital inclusion.

Future Scope

- Expansion to nationwide level covering multiple sectors.
- Predictive analytics for smarter job-market strategies.
- Mobile-first AI-driven apps for rural accessibility.
- Integration of digital payments and micro-learning resources.
